9.1. DIFFUSION, COMMUNICATION AND TRAINING

O.M.T. Fabbrica Viterie is committed to bring the knowledge of this Code of Ethics to all the employees of the Company and to those who have collaborative relations with it, even on a temporary basis.

The Code of Ethics is brought to the attention, inside and outside the Company, by means of appropriate communication activities (display of a copy of the Code on the Company notice board, insertion on the Company portal, insertion of an informative note about the adoption of the Code in all contracts).

All the interested parties must formally confirm in written form that they have received the Code of Ethics and that they are aware of its contents.

9.2. IMPLEMENTATION

The Addressees must be aware of the existence of control procedures and be conscious of their contribution to the achievement of the Company's objectives and efficiency.

Internal controls are understood to be all the tools necessary or useful for guiding, managing and verifying the Company's activities with the aim of ensuring compliance with the law and Company procedures, protecting the Company's assets, managing activities efficiently, and providing accurate and complete accounting and financial data.

The responsibility to create an effective internal control system is common to every operational level. Consequently, all "addressees", within the scope of their functions, are responsible for the definition, implementation and correct functioning of the controls inherent to the operational areas assigned to them.

Within the scope of their responsibilities, department or unit heads are required to be involved in the Company's control system and to involve their employees in it.

Every operation and transaction must be correctly recorded, authorised, legitimate, coherent, congruent and verifiable.

All actions and operations of the Company must be properly recorded, and it must be possible to verify the process of decision, authorisation and execution. For each operation there must be an adequate documental report, in order to be able, at any time, to carry out controls that certify the characteristics and motivations of the operation and identify who authorised, performed, recorded and verified it.

The person in charge of the Quality Management System and in general the personnel (possibly external) who perform internal audits within the scope of ISO 9001/IATF 16949, as far as within their competence, are entrusted with the responsibility of verifying the implementation of the Code of Ethics and the compliance with it. In particular, within the relevant competences, the above-mentioned functions shall:

- monitor the initiatives for the diffusion of knowledge and comprehension of the Code of ethics;
- propose hypotheses for the revision of corporate procedures;

9.4. WHISTLE-BLOWING POLICY

The purpose of the whistleblowing policy is to ensure the anonymity of reports of non-compliance with laws or regulations, Company policies, rules and procedures and, in particular, with this Code of Ethics.

The Company is committed to facilitate whistleblowing so that it can benefit from it and intercept non-compliant behaviours on time, in order to remedy and correct them.

The whistleblowing system is the tool through which protection is provided to those who report non-compliance in good faith. The aim of the tool is to prevent the occurrence of irregularities within the organisation, but also to involve all interested parties and, more in general, all the people around the Company, in activities to combat non-compliance, through active and responsible participation.

All interested parties may report, in writing and non-anonymously, any violation or suspected violation of this Code of Ethics by ordinary email to the following address:

O.M.T. Fabbrica Viterie S.r.l.
Segnalazioni Whistleblowing
Via Guglielmo Marconi 8/E
24030 – Brembate di Sopra (BG) – Italia

The CEO of the Company (the only one with access to the Whistleblowing correspondence) analyses the report, possibly consulting the author and the person of the alleged violation.

The CEO acts in such a way as to protect whistleblowers against any kind of retaliation, intended as an act that may rise even the mere suspicion of being a form of discrimination or penalisation (e.g. for suppliers: interruption of business relations; for employees: non-promotions, etc.). The confidentiality of the identity of the whistleblower is ensured, without prejudice to legal obligations. The CEO activates the competent corporate functions to confirm and define corrective and/or sanctioning measures, to take care of their implementation and report the results to the board of directors.

O.M.T. Fabbrica Viterie ensures that whistleblowers who report in good faith will be protected against any form of retaliation, discrimination or penalisation, and their identity will be kept confidential, without prejudice to legal obligations and the protection of the Company's rights.

9.5. CODE VIOLATIONS AND SYSTEM OF SANCTIONS

Compliance with this Code of Ethics by all employees is additional requirement to the obligation to fulfil the general duties of loyalty, fairness and performance of the employment contract in good faith, as required pursuant to and for the purposes of Articles 2104 and 2105 of the Civil Code. It must also be considered an essential part of the contractual obligations assumed by non-subordinate collaborators and/or persons having business relations with the Company.

Violation of the rules of this Code may constitute a breach of the obligations arising from the employment relationship, in accordance with Art.7 of the Workers' Statute (Law No. 300 of 30 May 1970) with all contractual and legal consequences, including termination of the contract and/or assignment, and may entail compensation for damages arising therefrom.

- The display on the appropriate notice boards.

O.M.T. Fabbrica Viterie undertakes to update the contents of the Code of Ethics when requirements dictated by changes in the context, in the reference regulations in force or in the Company organisation make it appropriate and necessary.

Any declared provisions of this Code of Ethics that should go against the applicable law, e.g. as a result of a regulatory and/or legal development, shall immediately be considered null and void.

Any subsequent amendments to this Code of Ethics must be approved by the board of Directors of **O.M.T. Fabbrica Viterie** in accordance with the applicable regulations, requirements and legal provisions.
